Github: purachetzheng **Devlab:** Purachet Zheng

PROFILE

An IT student with specifically an interest in Client-side development using JavaScript frameworks. Experienced with Vue framework, Spring-Boots framework, and UX Design.

EDUCATION

King Mongkut's University of Technology Thonburi	**Aug 2020 – Present**
Bachelor of Science in Information Technology	GPA 3.74

SKILLS

Coding Languages	Java, JavaScript, HTML/CSS, SQL
Frameworks/Libraries	Vue.js, React, Spring-Boots, Tailwind CSS, MSAL, JSON Server, Yup
Other	Git, MySQL, MongoDB, Firebase, Figma

ACTIVITIES & ACHIEVEMENTS

**Rank four in Devlab – BorntoDev	Cert**	**Jan 2023**

Solve programming questions with programming skills and problem-solving skills.

**Instructor	Pre-IT#28 Starter Pack**	**Jun 2022 - Aug 2022**

Prepared information and taught Web Technology to new first-year students.

**Popular Vote in SIT Playground: Homework Service	Figma**	**Apr 2022**

Designed a web application prototype for solving homework submission problems.

PROJECTS

Online Appointment Scheduling System (Integrated Project)	**Apr 2022 - Dec 2022**

Front-end Developer | Vue.js, Spring Boots, Docker | **Site** & **GitHub**

- Designed and developed a web application to facilitate students in scheduling online appointments with lecturers.
- Built a Vue application connecting with REST API services to allow users to view, filter, search, book, edit, and delete events in real-time, depending on the user's Role.

Unique Image Slider	**Aug, 2022**

HTML/CSS, Vanilla JavaScript | **Demo** & **GitHub**

- Built a dynamic carousel-style image slider that allowed users to scroll slides with navigation dots or arrows. And user can set auto scroll time or animation time using Vanilla JavaScript without hardcode pixel values.

User Manager	**Feb 2022 - Apr 2022**

Vue.js, JSON Server | **Github**

- Built a web application to allow users to view, add, edit, and delete users in tables. The applications also include features such as multiple tags, search, and sorting.

PZ-Online-Shopping-01	**Feb, 2022**

Vue.js, Open Public APIs | **Demo**

- Built a web application to allow users to view products, add or delete products in the cart, change the number of products, and calculate the price of all selected products.
